

## STAINES HYDRAULIC BEAVERTAIL PLANT TRAILER

Our Staines Tri axle hydraulic beaver tail Plant Trailer is manufactured using a heavy duty chassis, cross rails to offer full support to the siderails and a sturdy drawbar. Additional ramps are not required as our 8ft section is lowered to the floor at a 20 degree angle by hydraulic rams. This allows the trailer to accommodate any track width of machine. Our beavertail has a lifting capability of approximately 6 ton, which gives you use of the full length of the flat bed. Our new locking system comes fitted with over centre gravity lock, which creates an automatically safe locking system.
